MANAGEMENT DISCUSSION AND ANALYSIS

The Board is pleased to announce the Group's first quarterly results for the three months ended 31 March 2022 (the "2022 Period").

Business Review

The Group's principal activities during the 2022 Period were (i) wine trading; (ii) production, sales and distribution of food products in Hong Kong.

Wine Trading

The Group's wine trading segment continued as the major revenue segment during the 2022 period. The Board believes the development of the wine trading business represents a good opportunity to further expand its distribution and wholesale channels and help diversify the Group's business. The Group's wines are mainly from various reputable vineyards and wineries from Australia, with a focus on premium quality wine as the major product. During the three months ended 31 March 2022, the wine trading operation has achieved stable results and recorded a slight increase in revenue to approximately HK\$41 million (2021: approximately HK\$33 million) with a segment profit of approximately HK\$586,000 (2021: profit HK\$615,000).

Food products operation

During the 2022 Period, the revenue from the food products operation accounted for approximately HK\$1.4 million (2021: no reported revenue) as two shops had started operation since July and August 2021. And this segment generated a loss of approximately HK\$66,000 (2021: loss HK\$44,000). During the 2022 Period, this business segment was continuously clouded by the COVID-19 pandemic which resulted in lack of social gatherings, corporate functions and public events plus increased competition.

Financial Review

During the 2022 Period, the Group's revenue amounted to approximately HK\$43 million which was approximately 30% more than that of the last corresponding period. The increase was mainly due to the increase in revenue from wine business from approximately HK\$33 million for the 2021 Period to HK\$41 million for the 2022 Period and the increase in revenue from food products operation from approximately HK\$1.4 million since this segment had started the operation in the second quarter of 2021.

Cost of sales and inventories consumed mainly comprised cost of wines, vineyard costs and food materials. The cost of sales and inventories consumed increased by approximately HK\$9.8 million, or approximately 33% from approximately HK\$29 million for the 2021 Period to approximately HK\$39 million for the 2022 Period. The increase of the cost of sales and inventories consumed is mainly due to the decrease of the profit margin in the wine trading business due to the price adjustment for market development during the 2022 Period.

Employee benefits expenses decreased by approximately HK\$141,000, or approximately by 16.2% from approximately HK\$868,000 for the 2021 Period to approximately HK\$727,000 for the 2022 Period. The Group regularly reviews the work allocation of the staff to improve and maintain a high standard of service.

Administrative expenses mainly included advertising and promotion fee, bank facility fee, legal and professional fee and other administrative expenses. The Group recorded increase in administrative expenses by approximately HK\$416,000, or approximately 46% from approximately HK\$911,000 for the 2021 Period to approximately HK\$1,327,000 for the 2022 Period.

Finance costs mainly included interest on bank borrowings, interest on promissory notes and interest on lease liabilities. The Group recorded decrease in finance costs by approximately HK\$173,000, or approximately 15% from approximately HK\$1,175,000 for the 2021 Period to approximately HK\$1,002,000 for the 2022 Period.

Outlook and Prospects

In view of the less volatile results in wine trading segment for the 2022 Period and the positive future prospects of the wine industry in Hong Kong, wine trading represents a good opportunity for the Group to further expand its distribution and wholesale channels which will help diversify the businesses of the Group. As such, it is the intention of the Group to further strengthen its sales capability in wine trading with more advertisement and promotions targeting the Asia Pacific Economic Cooperation (“APEC”) wine market. Apart from continuing efforts in product portfolio expansion and on-line marketing, the Group will seek acquisition opportunities to enhance the operating scale and performance of the wine trading segment. The Group is of the view that such acquisition would bring positive effects in the development of the existing wine trading business by expanding our APEC customer base and wine supply channels and the introduction and cultivation of expertise with relevant skill sets and connections in the wine trading industry.

The ongoing pandemic situation causing reduction in retail rentals leading to the Board to consider the possibilities of establishing new outlets for the food production business instead of the previous model in a restrictive and costly commissioned to concessionaire stores for food distribution and selling.

The Group will closely monitor and review the performance of existing businesses in order to concentrate our limited resources to develop business with the greater potential for growth and profitability. The management strives to diversify the Group’s existing businesses and broaden its source of income.
